**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

-Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Rupprecht et al. (US 6,334,006)

Rupprecht teaches treating a human with a joint disease, comprising the following steps:

-Obtaining an MR image of the hand and its joints, inclusive of the joint disorder (Column 2, lines 23-30)

-Evaluating osteo age and dimension of the joint.

-Apply hormonal therapy, if needed. (Column 3, lines 15-20)

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

-Claims 1-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paul et al. (US 5,320,102), and in view of Hunziker (US 5,853,746).

Paul teaches a method of diagnosing cartilage disease, comprising MR imaging of the cartilages at different times (Column 3, lines 58-67), analyzing the images by looking at the cartilage thickness and biochemical constituents, such as the proteoglycan levels (Column 4, lines 20-25 and Column 5, lines 65-67), determining whether the joint is diseased by looking at the proteoglycan levels, and selecting a particular therapy based on the diagnosis. (Column 11, lines 35-55) However, Paul fails to teach a particular therapy. Hunziker teaches a method of cartilage therapy comprising the use growth factors. (Column 19, lines 25-67 and Column 24, lines 55-60) It would have been obvious to one having ordinary skill in the art at the time the invention was made to adapt the teachings of Hunziker to that of Paul such that proper treatment could be made to cure the diseased cartilage.

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

-Aouni-Ateshian et al. (US 6,161,080) teaches a method of generating a three dimensional model of a joint, simulating diseased cartilage, and using the model to plan a surgery around the joint.
